Profile Summary

Software Engineer with 1.5+ years of experience in .NET Core and Angular, specializing in building scalable web applications. Hands-on experience in developing real-time functionalities for enterprise-level applications. Strong knowledge of RESTful APIs, front-end component design, and database optimization. Passionate about delivering high-quality solutions in fast-paced environments.

Area of Expertise

- Programming & Frameworks: C#, .NET Core, ASP.NET MVC, Angular, Entity Framework, Core Java
- Databases: PostgreSQL, SQL Server, SSMS, Stored Procedures
- Web Technologies: HTML, CSS, JavaScript
- Testing: Unit testing
- Development Concepts: RESTful API design, Data Structures & Algorithms, Full-stack web application development, basic understanding of software design principles and design patterns
- DevOps & Version Control: Git, Azure DevOps (Repos, branching, pull requests)
- Tools & IDEs: Visual Studio, Visual Studio Code

Work Experience

Capgemini – Software Engineer **November 2024 -Present**

- Worked on updating and maintaining reusable code components to ensure stability and performance.
- Improved API performance by optimizing LINQ queries and stored procedures, reducing average response latency across workflows.
- Worked on minor feature enhancements and bug fixes in **.NET Core** and **Angular** under senior developer guidance.
- Contributed to front-end component adjustments (UI changes, validation logic) and backend API updates.
- Used **SSMS** to perform basic database queries, data corrections, and schema updates.
- Gained basic exposure to CI/CD pipelines, understanding build, deployment, and release processes.
- Assisted in application monitoring and log analysis during issue investigation (basic exposure).
- Documented daily tasks and progress, sharing end-of-day status reports with the team and project leaders.
- Used Git/GitHub for version control, branch management, and code reviews.
- Collaborated with senior engineers to understand requirements, clarify tasks, and ensure proper code integration.
- Gained exposure to Agile practices by participating in stand-ups, sprint reviews, and code walkthroughs.

Education

Bachelor of Technology (B.Tech)
C R Reddy college of Engineering- Eluru, Ap 2019 – 2023
CGPA: 7.87

Sri Chaitanya Jr College (Intermediate)
C R Reddy college of Engineering - Eluru, Ap 2017 – 2019
CGPA: 9.82

Personal Project

- Developed a **full-stack e-commerce application** using **ASP.NET MVC, C#, and SQL Server (SSMS)**.
- Implemented core functionalities such as **user authentication, product catalog management, shopping cart, and order processing**.
- Designed a responsive front-end with **MVC views** and integrated backend logic for seamless data flow.
- Gained practical experience in **RESTful API development** and connecting front-end components with backend services.
- Enhanced problem-solving and coding skills by working on **real-time features** like product search and filtering.
- Designed and developed RESTful APIs and implemented CRUD operations with proper validation and error handling.

Projects

Anaqua – Intellectual Property Management Platform

Worked on a large-scale product, contributing to both backend and front-end enhancements. Focused on small functionality improvements, bug fixes, and smooth integration of new features. Collaborated with senior developers to ensure code quality and maintainability.

Technologies: .NET Core, Angular, SQL Server

- Developed and maintained backend functionalities using .NET Core.
- Implemented UI changes and validation logic in Angular components.
- Assisted in minor feature enhancements and bug fixes across modules.
- Performed basic database queries and schema updates using SSMS.
- Participated in Agile ceremonies including stand-ups, sprint reviews, and code walkthroughs.
- Explored AI-assisted development using GitHub Copilot, leveraging a Claude 4.6 model during a proof-of-concept to improve coding efficiency and solution exploration.

Awards

- **GEM Award** and **Client Appreciation Award** for stabilizing critical USPTO integrations and improving system reliability.
- Received Capgemini "**WOW Award**" for consistent delivery and quality contributions.
- **Client Product Team Appreciation** for effective contributions to feature development and strong delivery ownership.
